Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	**Supported**	Please refer to the *Section 1194.21 Software Applications and Operating Systems - Detail* table below.
Section 1194.22 Web-based Internet Information and Applications	**Supported**	Please refer to the *Section 1194.22 Web-based Internet Information and Applications - Detail* table below.
Section 1194.23 Telecommunications Products	Not applicable	
Section 1194.24 Video and Multi-media Products	Not applicable	
Section 1194.25 Self-Contained, Closed Products	Not applicable	
Section 1194.26 Desktop and Portable Computers	Not applicable	
Section 1194.31 Functional Performance Criteria	**Supported**	Please refer to the *Section 1194.31 Functional Performance Criteria - Detail* table below.
Section 1194.41 Information, Documentation, and Support	**Supported**	Please refer to the *Section 1194.41 Information, Documentation, and Support - Detail* table below.

Section 1194.21 Software Applications and Operating Systems - Detail
Voluntary Product Accessibility Template

1194.21 Criteria	Supporting Features	Remarks and Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	**Supported**	Common functions are accessed through the VShell Control Panel and have mnemonics and/or standard Microsoft Windows keyboard navigation. Some advanced options are accessible through the Windows registry editor. Editing the registry is not required for most VShell configurations.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	**Supported**	VShell 4.4 for Windows follows Microsoft Windows standards. There is no known conflict with any accessibility software that is Windows compliant. By default VShell 4.4 for Windows makes use of TCP/IP port 22, but can be configured to run on a different port.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that assistive technology can track focus and focus changes.	**Supported**	VShell 4.4 for Windows follows Microsoft Windows standards to indicate focus. VShell 4.4 for Windows does not have a cursor.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to assistive technology. When an image represents a program element, the information conveyed by the image must also be available in text.	**Supported**	VShell 4.4 for Windows uses standard Microsoft Windows controls. No toolbars are used in VShell 4.4 for Windows.

1194.21 Criteria	Supporting Features	Remarks and Explanations
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	**Supported**	VShell 4.4 for Windows uses standard and consistent images.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	**Supported**	VShell 4.4 for Windows uses standard system functions to send textual information to the operating system.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	**Supported**	VShell 4.4 for Windows uses the system display attributes.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not Applicable	VShell 4.4 for Windows does not use animation.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Not Applicable	VShell 4.4 for Windows does not use color coding as a means of conveying information.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	VShell 4.4 for Windows does not allow color and contrast settings to be adjusted. VShell 4.4 for Windows uses the system settings.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	VShell 4.4 for Windows does not have any flashing or blinking text, objects, or other elements.
(l) When electronic forms are used, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	VShell 4.4 for Windows does not use electronic forms.

Section 1194.22 Web-based Intranet and Internet Information and Applications - Detail
Voluntary Product Accessibility Template

1194.22 Criteria	Supporting Features	Remarks and Explanations
(a) A text equivalent for every non-text element shall be provided (*e.g.*, via “alt”, “longdesc”, or in element content).	**Supported**	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not include any multimedia presentations.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	**Supported**	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	**Supported**	The only document included with the User Web Interface in VShell 4.4 for Windows is an online help file that is readable without its style sheet.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not use image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not use image maps.
(g) Row and column headers shall be identified for data tables.	**Supported**	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	The User Web Interface in VShell 4.4 for Windows has only one logical level of rows and one logical level of columns.
(i) Frames shall be titled with text that facilitates frame identification and navigation.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not perform any operations that would cause the screen to flicker.

1194.22 Criteria	Supporting Features	Remarks and Explanations
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	Applicable provisions of section 1194.22 are supported in other ways.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.	**Supported**	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not require applets, plug-ins, or other applications.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not include any electronic forms.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not Applicable	The User Web Interface in VShell 4.4 for Windows does not incorporate any repetitive navigation links.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	**Supported**	If a maximum idle time is specified in VShell 4.4 for Windows, the User Web Interface will prompt the user to indicate they want to continue the session.

Section 1194.31 Functional Performance Criteria - Detail
Voluntary Product Accessibility Template

1194.31 Criteria	Supporting Features	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	**Supported**	
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	**Supported**	
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Not Applicable	VShell 4.4 for Windows does not use audio.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not Applicable	VShell 4.4 for Windows does not use audio.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not Applicable.	VShell 4.4 for Windows does not require speech.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	**Supported**	

Section 1194.41 Information, Documentation, and Support - Detail
Voluntary Product Accessibility Template

1194.41 Criteria	Supporting Features	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	**Supported**	VShell 4.4 for Windows ships with HTML Help (.chm). Alternate formats of the documentation are available upon request.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	**Supported**	Information about VShell 4.4 for Windows's accessibility features will be provided upon request.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	**Supported**	Support for VShell 4.4 for Windows is available via telephone or e-mail.
